

Mauritius Telecom showcases its expertise for academics and students from a renowned Canadian university. The CEO Kapil Reesaul welcomed this Friday 26 April a delegation, consisting of distinguished Professors and MBA students from the University of Manitoba, during an event at the Telecom Tower. The delegation had the opportunity to gain insights into the company and the telecommunication/ICT landscape in Mauritius. MT will be favouring exchange programs for university students to keep a close link between industry and tertiary studies, where those students may gain valuable hands-on concrete concepts and experience.
